Industrial Training Institute (ITI) Grading

ITI Grading

The Directorate General of Employment and Training (DGET), Ministry of Labour and Employment, has introduced grading for ITI's. These grades are meant to provide a benchmark for these institutions as well as help them find their relative position as compared to other institutions.

B2K analytics has been empaneled by DGET to assign gradings to Industrial Training Institutes (ITIs).

Grading Criteria

ITI grades are assigned at two levels:

- a) Institute Level
- b) Trade Level

The different attributes considered under these levels are as per the table below:

Attributes For	
Institute	Trade
Qualified full time Principal	Space
Overall upkeep & Hygiene	Tools and Equipment
Safety Equipment	Machines
Power	Adequacy of qualified staff
Generator/Power Back	Practical conducted for students
Timely Record Maintenance	Students pass out
No-of total girls/ women trainees	Students employability (wage employment to include students going for higher education & self-employment)

Thus, B2K analytics will assign grades at the Institute and trade level. Institutions that provide courses for different trades will need each trade to be graded.

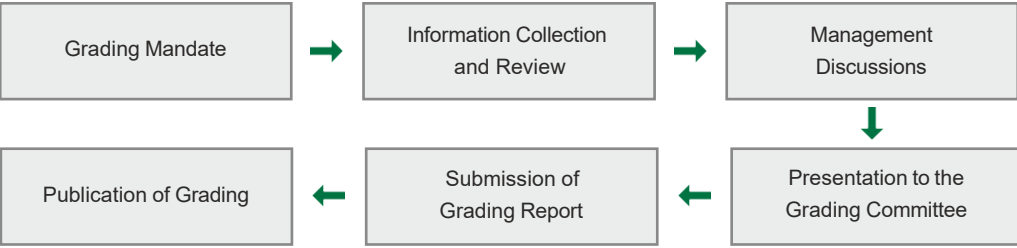

Gradings Scale

The grading is assigned on a 10 point Scale based on the parameters identified as by the DGET.

Grading					Points Ranging
5 Star					>= 8 and <= 10
	4 Star				>= 6 and < 8
		3 Star			>= 5 and < 6
			No Grading		< 5

Grading Process

The process for assigning a grade to ITI is shown by the flow chart below:

Grading Mandate

The mandate to undertake the grading of the ITI is signed between B2K analytics and the Institute

Information Collection and Review

An Information Requirement Specification document will be shared with the Institute. The information and data collected are then reviewed by B2K analytics.

Management Discussions

A management discussion will be conducted by the analysts. The management discussion typically follows the information review and may be conducted through the grading process, as and when required.

Presentation to the Grading Committee

The Grading Committee at B2K analytics has the final responsibility of assigning the grade, the analyst presents the case to the Grading Committee which then deliberates and recommends the grade for the Institute.

Submission of Grading Report

Post the recommendation of the committee, the analyst team submits the grading report to the Institute for review.

Publication of the Grading

The grading assigned is then published via a press release as well as in the website of B2K analytics.

About B2K analytics

B2K analytics Private Limited is a boutique risk advisory and management consulting company offering services in risk advisory, research, analytics, transaction advisory, and skill development.

B2K analytics is built on the foundation of trust and confidence that investors, issuers, Governments, multilateral agencies, and regulators have placed on Brickwork Ratings.
